

Demolition Permit

Town of Jackson
PO Box 268
Jackson, NH 03846

Date: _____

MAP: _____ Lot: _____

Property Owner: _____

Physical Address: _____

Mailing Address: _____

Telephone #: _____

Email: _____

Description of Structure being Demolished _____

Name, Contact Number, Email for Contractor responsible for the Demolition: _____

Where is the debris going? Name of Land Fill, Address, Phone # Email: _____

All utilities must be disconnected. ____ Yes. If not reason why _____

MUST HAVE AN ASBESTOS CERTIFICATION ATTACHED BEFORE APPROVED. See Department of Environmental Services Asbestos Abatement Inspection and Notification Requirements. **SEE ATTACHED.** Town of Jackson Building Inspector can waive this requirement's if not need.

If Not Needed Reason Why _____

By signing this document:

I/We understand that the information given is true and correct to the best of my/our knowledge and belief.

I/WE understand this permit is valid only for the work noted and expires 12 months from date of issuance

I/We understand that the demolition permit card shall be posted so as to be visible from the street.

I/We understand that violation of the terms of Zoning Ordinance, including beginning demolition without a demolition permit, will result in an immediate cease and desist order and I/We may be subject to fines outlined in RSA 676:17

I/We hereby agree the Building Inspector and/or his authorized agents have the authority to inspect the premises at any time.

I/WE have read the Department of Environmental Services Asbestos Abatement Inspection and Notification Requirements. See Attachment.

Home Owner (s) signature: _____ Date: _____

Home Owner (s) signature: _____ Date: _____

DEMOLITION PERMIT FEES:

Structures under 1,000 sq feet the permit fee is \$100.00.

Structures over 1,000 sq the permit is square footage x \$0.10.

Building Inspector & Fire Chief Approval Required:

Building Inspector Signature: _____

Fire Chief Signature: _____

Date Approved: _____

ASBESTOS ABATEMENT
INSPECTION AND NOTIFICATION REQUIREMENTS

Asbestos Management Program – NHDES, Air Resources Division

Background:

Asbestos is a naturally occurring mineral fiber, which due to its high tensile strength and insulating qualities was used in the manufacture of thousands of products. Many of these products were used in the construction of buildings, including insulations, surfacing materials, flooring, siding, and roofing. Asbestos fibers however, are a human carcinogen and their use has been strictly controlled since the 1970's.

The greatest potential for exposure to asbestos fibers occurs when asbestos containing building materials (ACBM) are disturbed during either building renovations or demolition. RSA 141-E and the NH Administrative Rules Env-A 1800, *Asbestos Management and Control* were promulgated to address this potential hazard, and require that owners and contractors take certain steps to identify and address asbestos hazards in structures prior to beginning any work that might disturb asbestos containing materials.

Specifics:

Pre-Demolition/Renovation Inspection. Env-A 1803 requires that a thorough inspection be conducted for the presence of asbestos containing building materials (ACBM), prior to any demolition or renovation, in the affected portions of the structure. The inspection must be conducted by a person who has received specific training and is qualified in the identification of ACBM. A current list of qualified inspectors can be obtained by calling 603-271-1370, or from the NHDES website at <http://des.nh.gov/organization/divisions/air/cb/ceps/ams/index.htm>.

Notification of Asbestos Abatement and Demolition Work. Env-A 1804 requires the owner or operator to submit written notification to the NHDES Air Resources Division, and the local health officer, at least ten working days before any demolition activity occurs, regardless of the amount of asbestos present, if any. Env-A 1804 also requires the owner or operator to submit written notification ten working days prior to any asbestos abatement activity conducted as part of a renovation or demolition, if it involves greater than 10 linear feet, or 25 square feet of ACBM. A fee may be required depending on the amount of asbestos being removed. Notification forms can be obtained by calling 603-271-1370, or from the NHDES website Asbestos Demolition/Renovation Notification Form.

Improperly removed asbestos from home renovation project.

What should I do with asbestos in my home?

Many homeowners have asbestos-containing materials in their homes. Although not required by the state, homeowners should have an inspection performed by a qualified asbestos inspector to properly identify these materials. Any asbestos-containing material that is in good condition and will not be disturbed should be left alone.

If these materials are deteriorating, or will be disturbed during renovation or demolition, they must be removed. Homeowners in single family, owner-occupied homes who do the work themselves are exempt from the state inspection and notification requirements, provided they will not be selling the home within six months. However, homeowners are required to package and dispose of the waste materials properly. Homeowners should use extreme caution when dealing with asbestos-containing materials, and should consider using a licensed asbestos abatement contractor for most removal projects.
